

Service Solution Overview

digdat® Connect helps you identify organisations that may have underground assets in a specific location. It is a nationally available, free, 24/7 online quick and easy to use 'look-up' service available to both businesses and the public.

Helpful for anyone seeking to undertake excavation and construction work, it is invaluable to anybody who needs to identify utilities and infrastructure companies that may have underground assets, such as pipes or cabling, or relevant local authorities pertinent to their area of search, within any area of Great Britain.

digdat® Connect delivers multiple benefits

- You can search whilst you are on-site from a smartphone or tablet because it is compatible with all the latest mobile browsers
- It's quick and easy to use because there is no registration required
- You can use it as many times as needed, there's no limit on usage
- You get instant results, great for when you are on site and urgently need to contact a utility company or other infrastructure-owning organisation
- Helps to avoid potentially costly asset "strikes" during excavation and construction
- You can print a map of a selected area together with a list of the contacts associated with that area

For further information please either call Customer Services on **0845 026 7676** email **info@digdat.co.uk** or visit **www.digdat.co.uk**

digital data on demand

 - Clean water
 - Gas
 - Waste water
 - Independent gas transporter
 - Telecoms
 - County Council
 - Electricity transmission
 - District Council
 - Electricity distribution
 - Greater London Authority
 - Electricity independent distribution network operator

Why Use digdat® Connect?

Use **digdat® Connect** when you are looking to identify if any utility and/or Infrastructure companies may have underground assets in the location you are planning to excavate.

It will give you instant results showing the organisations which may have assets in the location you have identified, as well as providing you with their contact details so you can contact them to confirm the presence and location of such assets.

Not only will you be able to quickly identify the organisations you need to contact, but more importantly, you will be able to avoid any potential risks of striking underground assets that may cause you harm or incur you liabilities for damages by asset owners.

Compatible with all the latest browsers and operating systems, you can use it pretty much anywhere, wherever you have an internet connection which means you could be standing in a field and you will be able to find out what you need.
